Kollman completes purchase of Prime Graphics

PA printing and converting firm to keep Wood Dale, IL, site.

By PRESS RELEASE -- Converting Magazine, February 25, 2010

Kollman Label and Packaging Group announced it has completed the purchase of Prime Graphics, Inc. Prime Graphics is a leading provider of innovative packaging solutions and decorative labels to consumer product companies within food, beverage, personal care, medical and private label markets. Prime Graphics is known for its award-winning flexographic printing of shrink sleeves, flexible packaging, roll-fed and pressure-sensitive labels.

Kollman Label and Packaging Group was formed in 2008 and completed its first acquisition that year of folding carton printer Dixie Printing & Packaging. The Group is engaged in bringing together unique, medium sized companies in the labeling and packaging industry. The companies jointly market their products to food, beverage, pharmaceutical and personal care companies in North America.

Kevin Kollman, President of Kollman Label & Packaging Group, said, "The acquisition of Prime Graphics is consistent with our strategic plan to grow the organization by providing our customers diverse product offerings within the packaging industry. Prime's capabilities and Midwest presence will be a great complement to the Dixie folding-carton customers and will now allow Prime's current customers one source for their carton and flexible packaging needs."

Prime Graphics will continue to operate out of its Wood Dale, IL location and will now operate under the new name of Prime Label & Packaging.
