

TABLE OF CONTENTS

Executive Summary	i
Introduction.....	i
Objectives	i
Energy, Carbon Footprint, and Energy Recovery Assessment Results	ii
End-of-Life Options for Flexible Packaging Results.....	iv
List of Acronyms and Abbreviations.....	x
1.0 Background.....	1
1.1 Introduction.....	1
1.2 Scope and Objectives	1
1.2.1 Study Design.....	2
1.2.1.1 Energy and Carbon Footprint Assessment.....	2
1.2.1.2 End-of-Life Assessments	4
2.0 Energy and Carbon Footprint Assessment of Flexible Packages.....	5
2.1 Technical Approach.....	5
2.1.1 Streamlining the Life Cycle Assessments.....	5
2.1.2 Selection of Data Sources	5
2.1.2.1 Package Manufacture.....	6
2.1.2.2 Packaging of Product	6
2.1.2.3 Package Descriptions	6
2.1.3 Validation of Data Sources	6
2.1.4 General Assumptions.....	7
2.1.4.1 Transportation Distances	7
2.1.5 System Boundaries.....	8
2.1.6 Construction of LCI Models	9
2.2 Results and Discussion of Energy Use and Carbon Footprint of Flexible Packages.....	9
2.2.1 Total Energy Consumption	10
2.2.2 Energy Consumption without Raw Materials Conversion	11
2.2.3 Carbon Footprint.....	13
2.2.4 Potential Energy Recovery	13
2.3 Discussion and Conclusions	15
2.4 Literature Cited and Data Sources	17
3.0 End-of-life Options for Flexible Packages.....	18
3.1 Current End-of-life Options for Manufactured Goods and Products.....	18
3.2 Municipal Solid Waste in America.....	18
3.3 End-of-Life Hierarchies for Packaging.....	21
3.3.1 Recycling	22
3.3.1.1 Historical Development	23
3.3.1.2 Current Recycling Infrastructure	23
3.3.1.3 Current Recycling Technologies.....	24
3.3.1.4 New Recycling Technologies/Developments	25
3.3.1.4.1 Sorting Technologies	25
3.3.1.4.2 New Uses for Old Packaging.....	28

List of Tables

Table ES-1.	Summary Results of Energy Use, Carbon Footprint, and Potential Energy Recovery of Flexible Packaging Systems.....	iii
Table 1.	Packages Assessed.....	4
Table 2.	Transportation Distance Assumptions.....	7
Table 3.	Total or System Energy Consumption for Flexible Packages and Alternatives...	10
Table 4.	Pellets-to-Grave Energy Consumption for Flexible Packages and Alternatives from Package Manufacture through End-of-Life (without raw materials conversion).....	11
Table 5.	Carbon Footprint for Flexible Packages and Alternatives.....	12
Table 6.	Potential Energy Recovery for Flexible Packages and Alternatives at End-of-Life.....	14
Table 7.	Potential Percentage Energy Recovery for Flexible Packages and Alternatives at End-of-Life.....	15
Table 8.	EPA Data on Generated MSW Amounts vs. End-of-Life Options.....	20
Table 9.	Biocycle and Columbia University Data on Generated MSW Amounts vs. End-of-Life Options.....	21
Table 10.	Packaging Hierarchies from Three Global Organizations.....	22
Table 11.	International WTE Facilities.....	37
Table 12.	A Comparison of Air Emissions from Several Electricity Generation Sources...	46
Table 13.	End-of-life Scenarios Compared Using MSW-DST.....	47
Table 14.	Historical Breakdown of Landfill Tipping Fees in the U.S.....	50
Table 15.	Energy Recovery Values from Various Combustion Sources.....	54
Table 16.	WTE in Japan.....	61
Table A-1.	Raisin Package Details.....	67
Table A-2.	Beverage Package Details.....	77
Table A-3.	Mailer Package Details.....	85
Table A-4.	Whole Muscle Meat Cuts Package Details.....	89
Table A-5.	Salty Snack Package Details.....	93

List of Figures

Figure ES-1.	Example system and life cycle stage boundary definition.....	ii
Figure 1.	Example System and Life Cycle Stage Boundary Definition.....	8
Figure 2.	EPA Historical Data on Total Amount of MSW Generated and Recycling Rates.....	19
Figure 3.	EPA Historical Data on Total Amount of MSW Generated, Compared Against Per Capita Waste Generation.....	19
Figure 4.	Biocycle and Columbia University Regional Breakout of Landfilling, Recycling, and WTE in the U.S. for 2004.....	21
Figure 5.	Single Stream Recycling of Residential Materials.....	23
Figure 6.	Material Identification Codes for Recycling.....	24
Figure 7.	Successful Separation of Mixed Plastics Waste Stream (both rigid and flexible) Using NIR and Stadler Technology.....	26
Figure 8.	NIR Scan Showing the Polymer Reading.....	27

Figure 9. Three NIR Sorting Technologies.....	27
