PolyExpert promotes Pierre Sarazin to Vice President of Research & Development and Sustainability

Laval, Quebec, February 11, 2020 – PolyExpert announces the promotion of Pierre Sarazin *Ph.D.*, to Vice President of Research & Development and Sustainability, effective as of now.

Pierre started working for PolyExpert in 2018 as Manager of Technical Services and Product Development and quickly rose to a supervisory position.

Mr. Sarazin holds an M.Sc.a. degree in Mechanical Engineering and a Ph.D. degree in Chemical Engineering from Ecole Polytechnique Montreal. His field of expertise includes traditional plastics, sustainable plastics, along with in-depth understanding of formulations tailored for various processing technologies.

Pierre Sarazin has contributed to the success of the company, particularly in sustainable product development where his previous experience and knowledge played a major role.

ABOUT POLYEXPERT

PolyExpert is a leading polyethylene film manufacturer that specializes in extrusion using a blown process. It has been providing high quality films to the North American market since 1979. The company's web site (www.polyexpert.com) contains more information.
