

Coating, laminating and metallizing machinery

## **NEWS**

**Editorial Contact: Giancarlo Caimmi 631-242 9898**

**Release: Immediate**

### **Piacenza, Italy: July 9<sup>th</sup>, 2020**

On July 14<sup>th</sup> it will be streamed live the second episode: **Future at a glance**, within the new format “Nordmeccanica Events”. Episode two focus on what Nordmeccanica intended to showcase at Drupa before the Dusseldorf show was postponed. Nordmeccanica planned to present for the first time ever in the history at an industry show a Triplex lamination in a single pass, performed live. Consequently the entire show intended for Drupa will be enacted live to the benefit of our customers and friends on July 14<sup>th</sup>. The event will present the patented Triplex SL One Shot. The 3-ply laminator that made possible in total reliability to laminate a multi-ply structure in a single pass using exclusively Solvent Less adhesives. The program includes the demonstration of the Triplex One Shot running a 3-ply structure and in a second run the same machine will be presented in Duplex mode featuring the Dow Symbiex adhesive lamination. It is the technology that combines innovative machine design and innovative adhesive chemistry to perform the quickest time to market for a two-ply lamination converted with solvent free adhesives. The show is completed with a demonstration run of solvent based adhesives running on the newly developed Super Combi 5000. A section of the show will cover the latest in terms of barrier enhancement as influenced by the machinery manufacturer and a report of the latest achievements of our cooperation with Henkel in the **BarrEnhanceTech Alliance**. The event is powered by extremely advanced technologies that will bring to our guests, conveniently on their computers at home or work via satellite, those contents in a show style through the benefit of professional video and sound in a form of entertainment that will add to the experience. The format that was so much appreciated during episode 1. Registration for the event is open at [www.nordmeccanica.com](http://www.nordmeccanica.com).

Coating, laminating and metallizing machinery

Coating, laminating and metallizing machinery

### **About Nordmeccanica**

**Nordmeccanica** is, globally, the largest manufacturer of Coating, Laminating and metallizing machinery. Serving the industry for over 40 years with products featuring: innovation; integrated design; use of quality components and the globally recognized value for money.

Nordmeccanica innovation has marked the history in our industry for decades; an incredible list of “industry first” proudly presented to our customers.

Nordmeccanica has made reliability in industrial machinery a winning concept. All Nordmeccanica products are completed and fully tested as a standard before shipment at one of the 5 state of the art facilities located at the Company Headquarter in Italy using components made in Western Europe and North America only. All Nordmeccanica products features the industry shorter start up time at final location thanks to the respect of quality criteria and assembly protocols unique in the industry.

Nordmeccanica offers in 5 locations around the world a full range of services, to include: parts; after sales; technological support; training classes and product development.
