

PRESS RELEASE | SARASOTA, FL | NOVEMBER 2, 2020

**ALLIEDFLEX® Technologies, Inc. introduces
Rotary Pouch / Bag Fill / Seal System:**

FLX R8

Rotary Pouch Packing Machines

at upcoming Pack Expo Connects 2020

Building on the popularity of their **FLX Machinery Series ALLIEDFLEX®** has expanded their program by introducing their new **FLX R8 Rotary Pre-Made Standup Pouch Fill | Seal** model to accommodate the filling and sealing of popular Pre-Made Standup / Zipper Pouches & QuadSeal Side Gusset Bags. Models include simplex (1 UP) and higher output duplex (2 UP) models

The new **FLX R8 Series** system can accommodate a wide variety of popular Pouch & Bag formats including popular Standup / Zipper and Quad styles. The **FLX R8 320 Z (zipper) model** – offers a wide size range to accommodate popular retail, club and food service sizes on a single machine platform with rapid size change over features. The **FLX R8 series** is designed to handle popular pre-made pouches and bags made of laminated, recyclable, compostable and biodegradable materials.

The **FLX R8 series** utilizes a **Rockwell - Allen Bradley Control System and User-Friendly Color Panelview HMI - Operator Interface**. The system is manufactured to meet UL and CSA electrical codes and sanitary construction features. The Rotary **FLX R8 series** can be configured with a multitude of filling systems including weighers, augers, liquid pumps and other feeding mechanisms to suit a multitude of product applications including retort pouch packaging applications. **The new FLX R8 series will be debuted at the upcoming Pack Expo – Connects scheduled for November 9-12.**
