Flexible Packaging

- > **Innovative**
- > **Widely Extendible into Diverse Product Categories**
- > **Maintains and Indicates Freshness**
- > **Offers Consumer Conveniences**
- > **Provides Reclosure and Dispensing Options**
- > **Is Easily Transported and Stored**
- > **Creates Shelf Appeal**
- > **Enables Visibility of Contents**
- > **Provides Efficient Product-to-Package Ratios**
- > **Uses Less Energy**
- > **Creates Fewer Emissions**
- > **Creates Less Waste in the First Place®**

As one of the fastest-growing segments of the packaging industry, flexible packaging combines the best qualities of plastic, film, paper, and aluminum foil to deliver a broad range of protective properties while employing a minimum of material.

Typically taking the shape of a bag, pouch, liner, or overwrap, flexible packaging is defined as any package or any part of a package whose shape can be readily changed.

Flexible packages are used for consumer and institutional products and in industrial applications to protect, market, and distribute a vast array of products.

Leading the way in packaging innovation, flexible packaging adds value and marketability to food and non-food products alike. From ensuring food safety and extending shelf life to providing even heating, barrier protection, ease of use, resealability, and superb printability, the industry continues to advance at an unprecedented rate.

The life cycle attributes of flexible packaging demonstrate many sustainable advantages. Flexible packaging starts with Less Waste in the First Place®, greatly reducing landfill discards. Innovation and technology have enabled flexible packaging manufacturers to use fewer natural resources in the creation of their packaging, and improvements in production processes have reduced water and energy consumption, greenhouse gas emissions, and volatile organic compounds. Even more, lighter-weight flexible packaging results in less transportation-related energy and fossil fuel consumption, and environmental pollution.

With its versatility, custom qualities, efficiency in conserving resources, and sustainability, there's no better time to consider flexible packaging for your new product line or as an upgrade to an existing package.

MAR-CO PACKAGING INCORPORATED

A quality product, delivered on time. At a reasonable price.

Since 1985.

Helping companies, of every size, bring products home around the world.

Limitless Solutions

Converting to Print

Profit Friendly Pricing

Flexible Packaging Sustainability

Helping the brightest companies, of any size, present and preserve. Responsibly.

1

RAW MATERIAL

Sourcing eco-friendly flexible films utilizing post consumer recycled content. Paper & recycle ready.

2

PRINTING

Utilizing ink reclaim program to minimize waste and recycle resources.

3

LAMINATING

Sourcing bio-compatible adhesives. Additional sustainability measures are project specific.

4

FINISHING

Bag & pouch finishing. Finished goods can be consumer recycled.

5

CUSTOMER

Customizable sustainable projects welcome - challenge us with your project needs!

With virtually endless stock and capabilities, Mar-Co Packaging is your guide for converting problems to solutions. No need for digital. We do custom runs at flexible quantities to meet your specific project needs.

Discover What Mar-Co Can Create with You.

They're not machines, they're solutions.

Built for speed, flexibility
and high output

The Apollo series of wicketers

Easy to operate, quick
changes, and ideal for
recycle-ready pouches

The Ares-400 stand-up
pouch machines

Equipment designed to help solve problems

Bag & Pouch-Making Machines | Pre-Applied & Recloseable Solutions

MAXIMIZE
EFFICIENCY

REDUCE
WASTE

DELIVER
QUALITY

INCREASE
PRODUCTIVITY

2900 S. 160th Street
New Berlin, WI 53151-3606
715-944-5006
sales@acscorporate.com
acscorporate.com

The ACS Group consists of the brands AEC, Cumberland, and Sterling. We design, manufacture, market, and support one of the most comprehensive lines of auxiliary products for the plastics processing industry.

Formed through a series of acquisitions, the ACS Group maintains an expansive product line, which includes size reduction equipment (granulators and shredders), material conveying equipment, metering and blending devices, heat exchangers (mold temperature controls units and chillers), drying systems, and presses. These products are marketed under such recognizable brand names as AEC, Sterling, Sterlco, Cumberland, Wabash, and Carver.

ACS Group offers a comprehensive product mix, which allows our company to be a solution provider, rather than just an equipment vendor, for a process-critical industry. The ACS Group offers technically superior products born from over 80 years of industry experience.

Today, the ACS Group goes to market through over 60 independent manufacturer's representatives, with certain direct sales efforts to select OEMs. With the ACS Customer Service Group, a customer can be confident that any after-sale needs, including parts, technical support, on-site service, training, and, in the distant future, re-manufacturing, will be quickly and accurately met. The ACS Customer Service Group is focused on having the right people and products in the right place and right time to ensure optimal production for our customers.

blaigeindustryanalytics.com

In 2003, Blaige Industry Analytics (BIA) started collecting packaging supply chain industry intelligence in a variety of substrates (film, foil, fiber) and reporting the trade competitive dynamics and strategic developments. BIA is the industry's comprehensive packaging resource in terms of investment and strategic activity. Industry consolidation amongst North American packaging converters has been the key trend that is affecting all participants in the flexible packaging converting supply chain including most of the Flexible Packaging Association (FPA) members, and understanding this trend is critical as it affects their vitality and success. Our 21-year consolidation study over two decades has uncovered significant trends in competitive dynamics and shifts in the packaging converting/supply chain competitive landscape. BIA also publishes special reports on consolidation trends within the segments specific to FPA members such as plastics, packaging, label, and contract manufacturing and packaging.

Comexi North America, headquartered in Miami, Florida, stands as a prominent global leader in delivering expertise and innovative solutions within the flexible packaging industry. Our diverse product offerings encompass flexo CI, offset CI, and digital printing presses, as well as cutting-edge slitters, laminators, and comprehensive services, all aimed at maximizing profitability and performance.

At the heart of our technological prowess are the Centers for Technological Excellence (CTec) situated in Girona, Spain, and Miami. These facilities serve as hubs for tailored equipment demonstrations, industrial trials, seminars, and targeted training courses. The expansive 15,000-square-foot U.S. facility boasts a flexo CI press, laminator, turreted slitter, and all essential ancillary equipment, positioning it as the largest and most comprehensive flexible packaging technological center in the United States. Collaborating with world-leading partners enhances our capabilities and ensures cutting-edge solutions.

Our commitment to exceptional service is reflected in our U.S.-based support and a fully stocked parts warehouse within the Miami facility. We strive to be a trusted and reliable partner you can depend on.

On a global scale, Comexi's headquarters is in Girona, with production facilities strategically located in Europe and South America. Our extensive commercial network spans over 100 countries, reinforcing our position as a leading player in the international flexible packaging arena.

**Cosmo Films Limited****Converter****199 Easy Street****Carol Stream, IL 60188****800-422-7655****customerservice@cosmofilms.com****cosmofilms.com**

Established in 1981, Cosmo Films Limited is one of the largest manufacturers of biaxially oriented polypropylene films (BOPP) and cast polypropylene films (CPP) in the world. Cosmo Films has additionally expanded into polyester films with a state-of-the-art production capability for BOPET and copolyester applications.

With manufacturing units in India, Korea, and the United States, Cosmo has a BOPP manufacturing capacity of 239,000 TPA, is the largest BOPP film exporter from India, and is the world's largest manufacturer of thermal lamination films.

Cosmo offers a comprehensive multi-polymer range of films for flexible packaging, lamination, labeling, and industrial applications, including specialty films such as high-barrier films, synthetic paper, velvet thermal lamination films, and direct thermal printable films.

SEI Laser has been one of the most dynamic and innovative companies in the world of laser technology since 1982. A leader in manufacturing and designing its own laser systems in its production site in Mapello, Italy, the company has now become a solid and international industrial reality, thanks to its wide net of branches and dealers all around the world. SEI Laser is currently able to satisfy every application need, customizing each system according to customer's requests. Throughout the years, the company has developed a huge range of laser solutions, which can operate in several markets, starting from visual communication and graphic arts, passing by paper converting and labeling, up to electronics and flexible packaging.

PackMaster is the range of laser systems designed by SEI for the cutting, scoring, and perforation of flexible packaging material such as single-layer PE, PET, PP, nylon, PTFE, laminated films, and paper. Our laser systems offer multiple innovative solutions including easy-open, window packaging, micro/macro perforation for easy ventilation, MAP, and other applications. SEI Laser's work of art is its R&D Department—new technologies come from continuous investments in research and innovation, which are essential to growth. Commitment, passion, and know-how are the keys to creating value and success.

toppan-usa.com

Toppan USA, Inc. is a leading global manufacturer of transparent high-barrier film based in Georgia. Toppan USA's GL FILM is used for a wide range of applications in the food and beverage, personal care, medical, and industrial sectors. GL FILM's history spans more than 30 years and it is used for more than 15,000 products in 45 countries.

Toppan USA was established in 2014 in Griffin, Georgia, as Toppan's first transparent barrier film manufacturing site outside Japan. Our business has grown significantly thanks to a strong flexible packaging market for our films and close relationships with customers.

Utilizing Toppan's cutting-edge technology, GL FILM's high-barrier, transparent, non-foil structure, and other features enrich people's lives by making packaging highly functional and more convenient.

With sustainability becoming increasingly important, Toppan USA is actively developing new barrier films for a sustainable society. These include PE-based and BOPP-based transparent high-barrier films that are ideal for mono-material packaging with outstanding recyclability. Toppan's original coating and deposition technologies enable these new barrier films to achieve a breakthrough in the recyclability of flexible packaging.

UTECO is a leading manufacturer of flexible packaging equipment. Established in 1985, we have grown to become the largest manufacturer of flexographic (flexo), digital printing presses, coating and lamination, and roto-gravure machines. Innovation has always been a key point at UTECO, not only in the design and creation of leading-edge equipment but also in the ability to tailor machines to specific needs. UTECO offers equipment for the flexible packaging, tag and label, corrugated, and pre-printed liner board segments (all ink processes including solvent-based, water-based, and UV and EB inks and coatings).

UTECO North America Inc.'s parts and service support structure is conveniently located in Atlanta, Georgia. This allows easy access to service and parts throughout the United States and Canada.

wh.group/na

Windmoeller & Hoelscher Corporation (W&H) is a major supplier of advanced flexographic and gravure printing presses, blown and cast film extrusion systems, multiwall bag making machines, as well as converting equipment for the flexible packaging industry in North America. W&H's engineering excellence guarantees customized solutions from a single machine order to a turnkey factory.

Since its inception, W&H has been granted over 1,633 patents worldwide, including the oscillating haul-off technology, internal bubble cooling, and the OPTIFIL P automatic die control. The company is well known for many industry "firsts," including the introduction of the first CI press in 1954 (OLYMPIA 1275), and the 1997 launch of NOVOFLEX, the industry's first gearless, direct drive, infinitely variable flexo press.

In addition to supplying the world's most comprehensive machinery program for the flexible packaging industry, W&H offers an extensive, reliable service program. W&H service is available 24/7, utilizing a comprehensive multimillion dollar warehouse to deliver the majority of parts from our Rhode Island stock. And W&H's 200,000-square-foot (18,500 m²) Technology Center in Lengerich, Germany, offers the most advanced training and testing labs for printing, extrusion, and packaging machinery.

Let's **UNITE** for **FLEXIBLES**

Unite for Flexibles and Make Your Voice Be Heard!

Representing one of the fastest growing segments in packaging, the Flexible Packaging Association is the leading voice for industry advocacy, education, and networking. Offering unparalleled support to members of the flexible packaging industry including converters, suppliers, academics, and more, we encourage you to become an essential part of the movement.

Through focused programs and services, FPA's mission is to amplify the voices of our members to build real growth for our members through effective advocacy, unique educational offerings, and outstanding networking opportunities.

CRITICAL ADVOCACY

Critical industry advocacy is backed by a strategic, proactive approach to making our voices heard at State Houses and on Capitol Hill.

ESSENTIAL NETWORKING

Essential networking opportunities, including FPA's Annual Meeting, FlexForward® Fall Conference, and more.

INDUSTRY INSIGHTS

Invaluable insights and research on the industry's most important initiatives that help to bolster your business and the greater flexible packaging community.

JOIN US

[Flexpack.org/Unite-For-Flexibles](https://flexpack.org/Unite-For-Flexibles)

To learn more about what an FPA membership can do for you, contact Emily Patten, Director of Membership and Meetings at epatton@flexpack.org.

The Flexible Packaging Association is the U.S. association of the manufacturers of flexible packaging; and material or equipment suppliers to the industry. Flexible packaging is produced from paper, plastic, film, aluminum foil, or any combination of those materials, and includes bags, pouches, labels, liners, wraps, rollstock, and other flexible products.
