LAKO Introduces Advanced Ultrasonic Sealing Capabilities for Packaging Applications

June 7, 2021 (Perrysburg, Ohio) LAKO has long been known for delivering the packaging industry's highest quality seal jaws, knives/anvils, and punches. Now LAKO can be considered your go-to source for ultrasonic film sealing solutions.

LAKO has recently added Bill Aurand as Manager of Ultrasonic Applications, bringing increased expertise in the field of ultrasonic sealing. LAKO's high precision machining, engineering and integration capabilities coupled with Bill's 35+ years of ultrasonic experience make LAKO the best single source for ultrasonic sealing applications in the packaging field.

LAKO is happy to work with any ultrasonic equipment. If you have already begun development with an ultrasonic equipment provider, LAKO can complement the relationship by assisting in the integration of the solution into your current packaging line.

Whether your application is cross seals, back seals, standup pouch top seals, or zipper crushing, LAKO can help make integrating ultrasonic sealing technology into your process a smooth and successful endeavor.

About LAKO: [LAKO](#) has over 40 years of experience in the flexible packaging industry, providing quick-change package sealing solutions for horizontal flow wrappers and vertical bagger machines. Delivering excellent product quality, experienced and prompt service, and leading advancements to increase ROI and reduce environmental impact.
